PROBLEM DEFINITION

DATA OVERVIEW

DATA PREPARATION & CLEANING

GETTING INSIGHTS FROM DATA

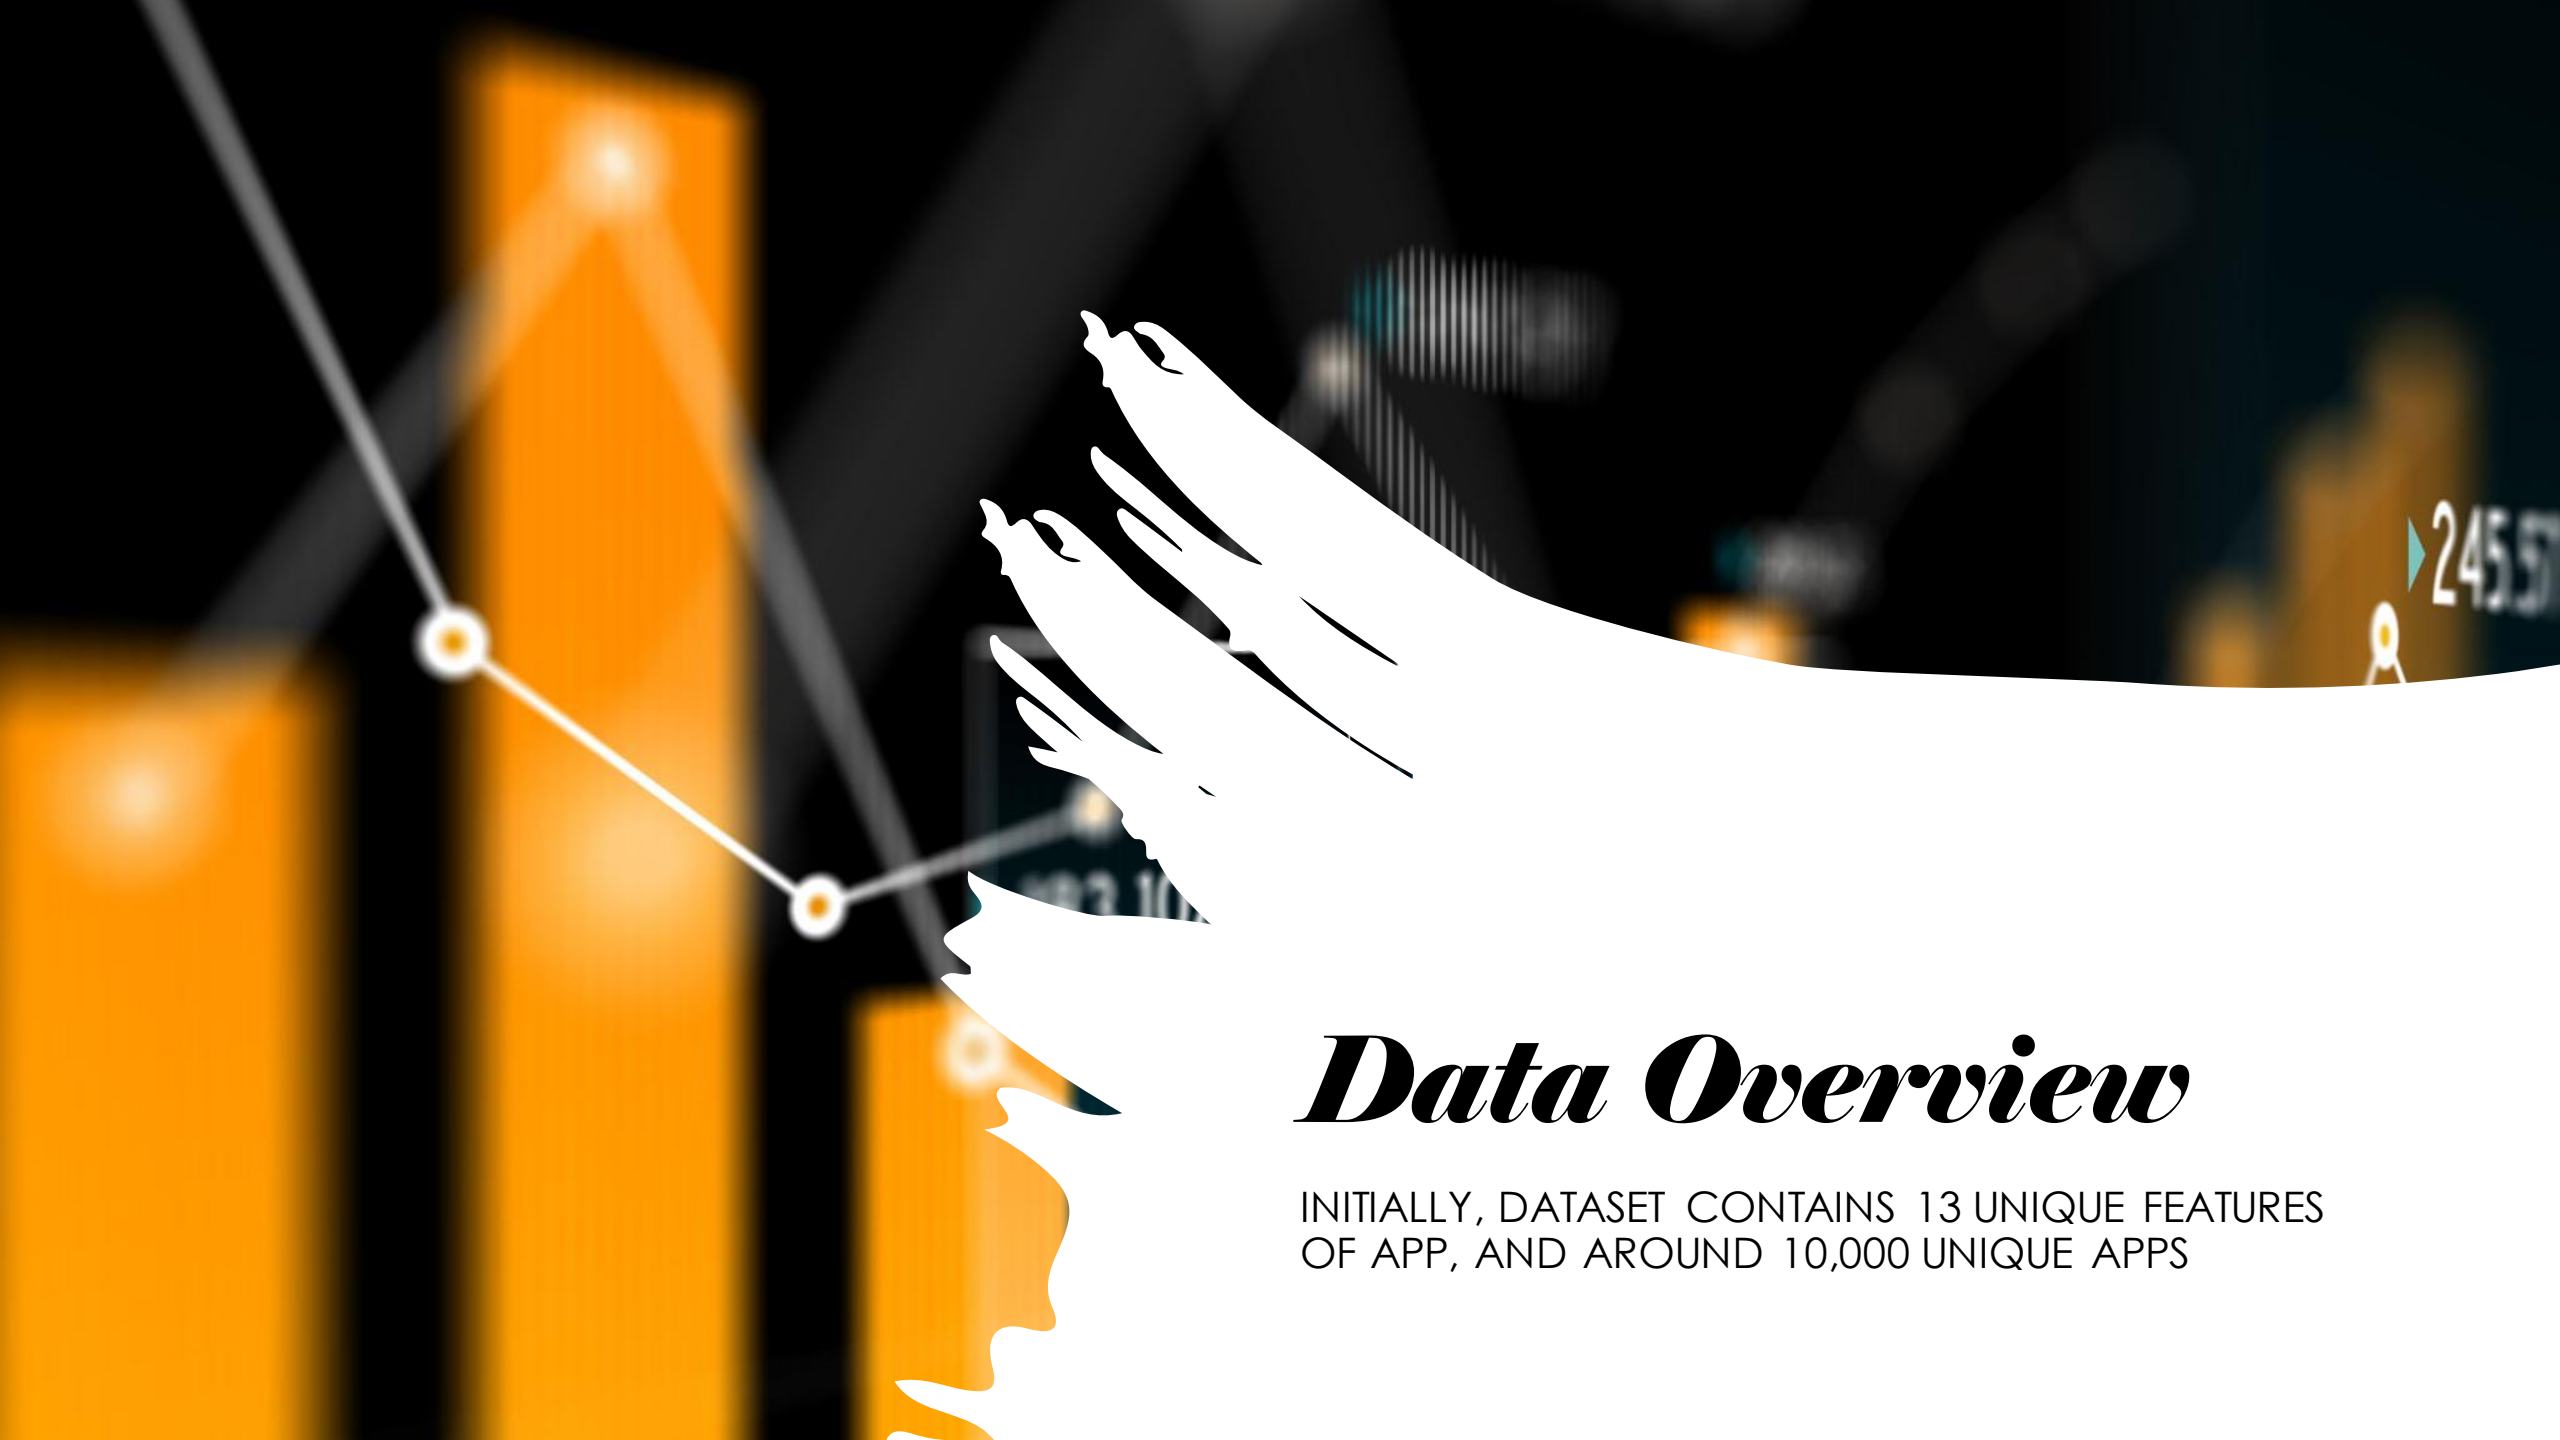
CONCLUSIONS

Problem definition

3 YEARS AGO, LAVANYA, KAGGLE CONTRIBUTOR UPLOADED ON KAGGLE DATASET, CONTAINING DETAILED INFORMATION ABOUT APPLICATIONS IN PLAY MARKET

Problem definition

- As a number of applications increasing, there is should be market research done, before picking theme and all details of app.
- Today, I will try to make a some decisions based on given data.



Data Overview

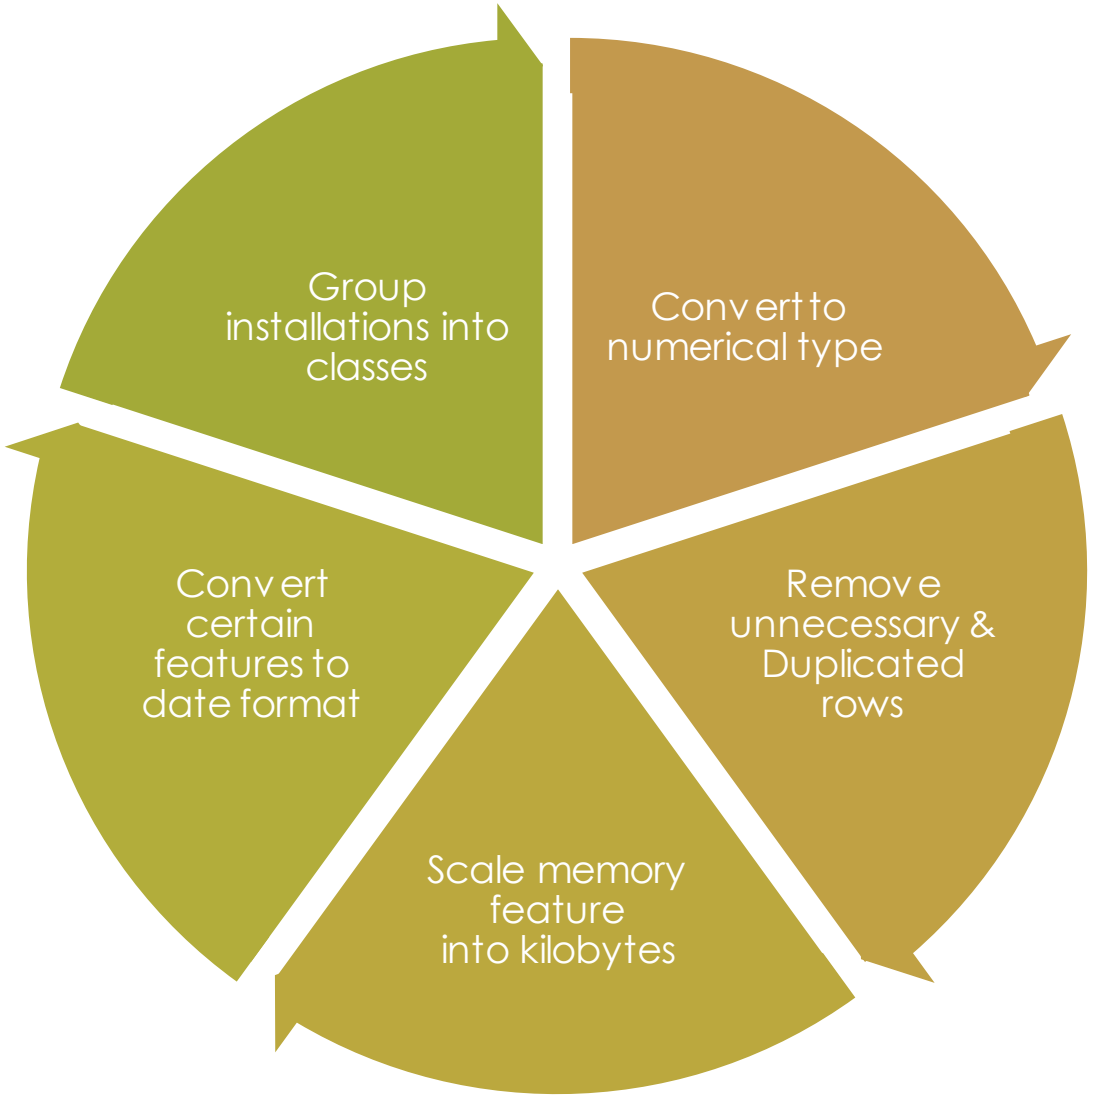
INITIALLY, DATASET CONTAINS 13 UNIQUE FEATURES OF APP, AND AROUND 10,000 UNIQUE APPS

Data Overview

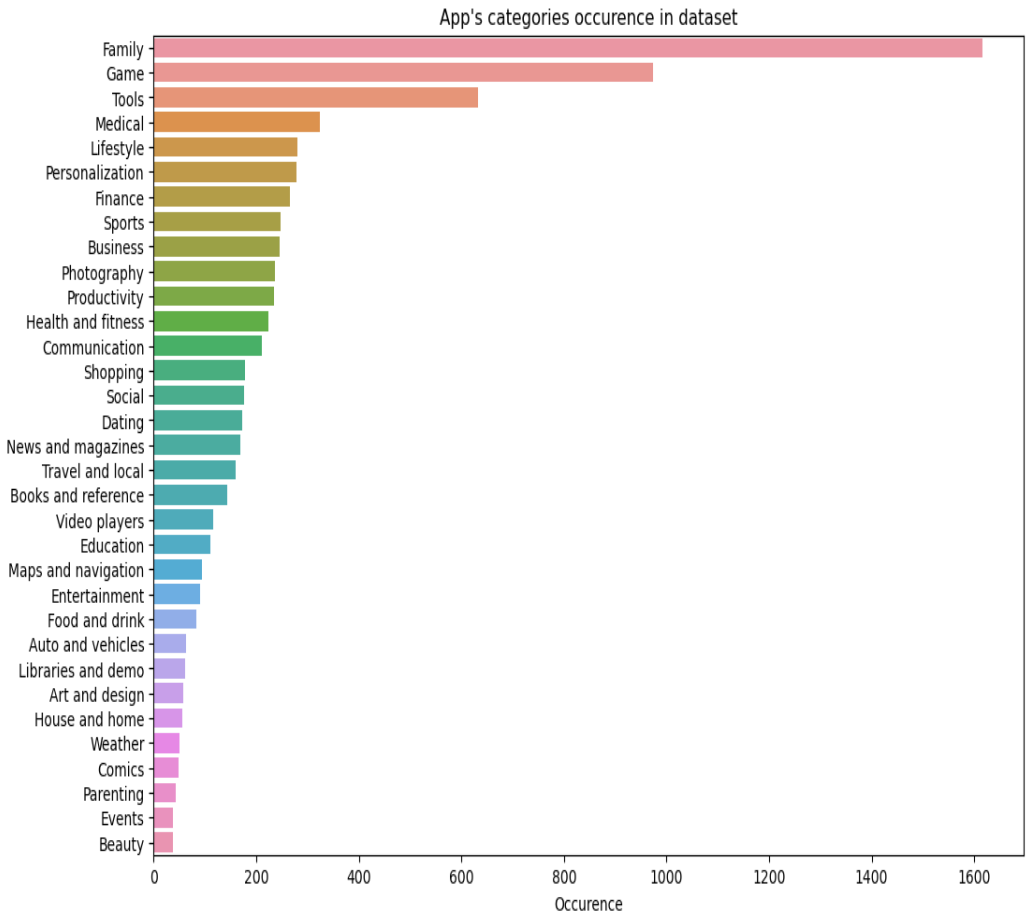
- These 13 features are: application name, category, rating, reviews number, size of application, number of installations, type (free or paid), price, content rating, genre, last update date, current version and android version

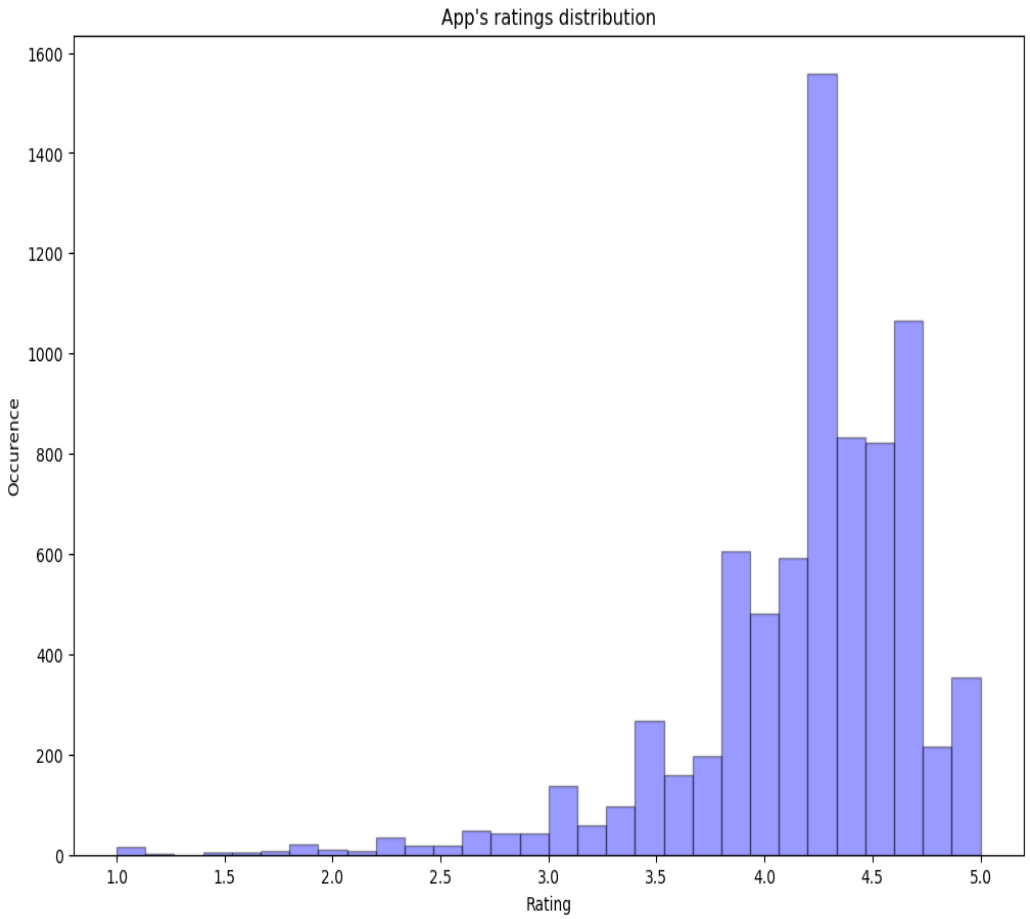
App	Category	Rating	Reviews	Size	Installs	Type
Photo Editor & Candy Camera & Grid & ScrapBook	ART_AND_DESIGN	4.1	159	19M	10,000+	Free
Coloring book moana	ART_AND_DESIGN	3.9	967	14M	500,000+	Free
U Launcher Lite – FREE Live Cool Themes, Hide Apps	ART_AND_DESIGN	4.7	87510	8.7M	5,000,000+	Free
Sketch - Draw & Paint	ART_AND_DESIGN	4.5	215644	25M	50,000,000+	Free
Pixel Draw - Number Art Coloring Book	ART_AND_DESIGN	4.3	967	2.8M	100,000+	Free
Paper flowers instructions	ART_AND_DESIGN	4.4	167	5.6M	50,000+	Free
Smoke Effect Photo Maker - Smoke Editor	ART_AND_DESIGN	3.8	178	19M	50,000+	Free
Infinite Painter	ART_AND_DESIGN	4.1	36815	29M	1,000,000+	Free

Data preperation & cleaning

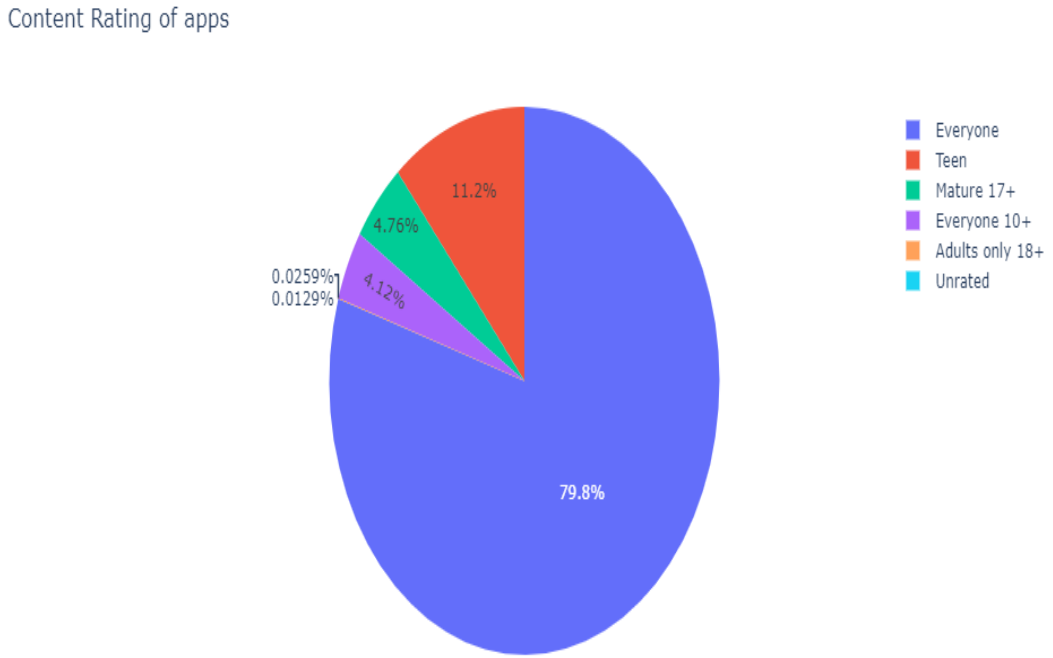


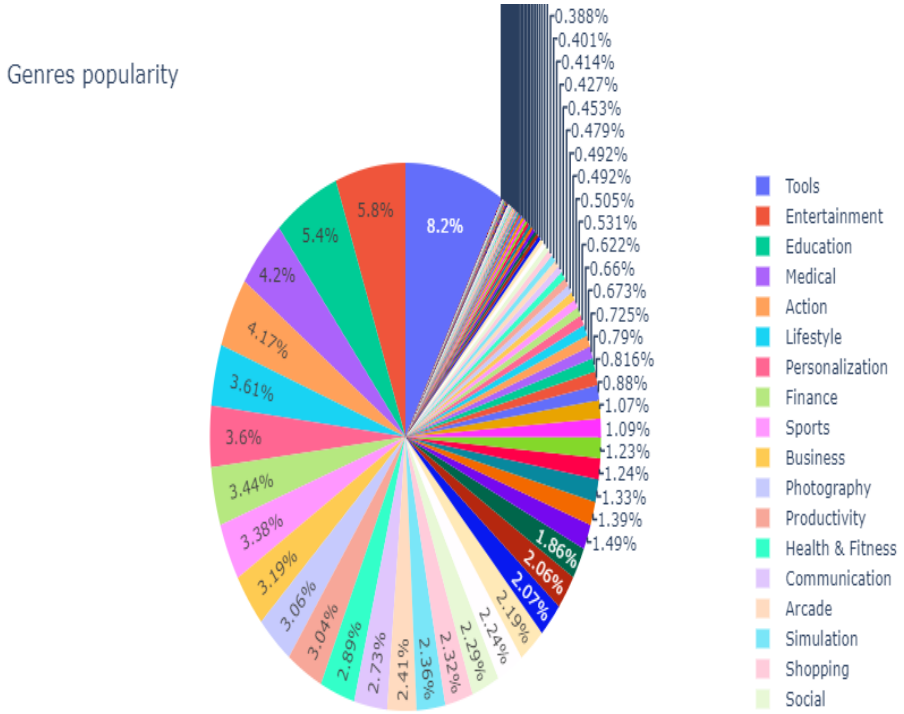
Getting insights from data: category and ratings distribution



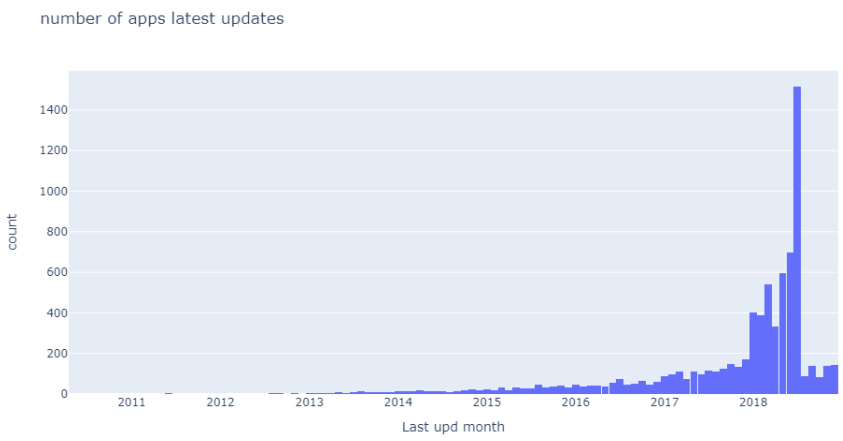


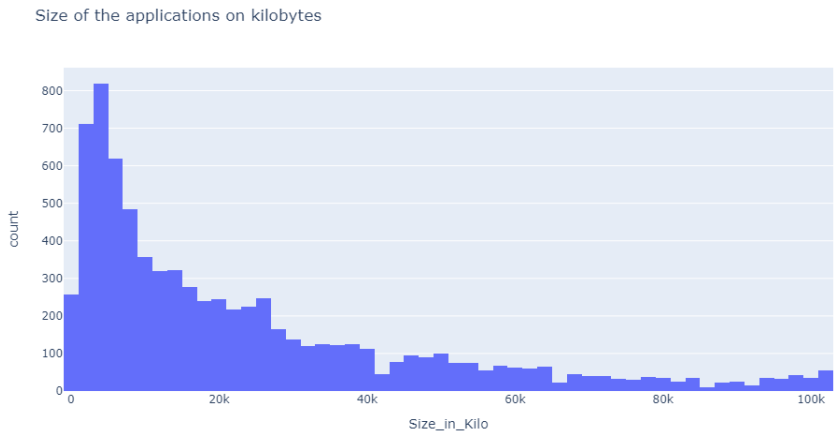
Getting insights from data: content rating and genres distribution



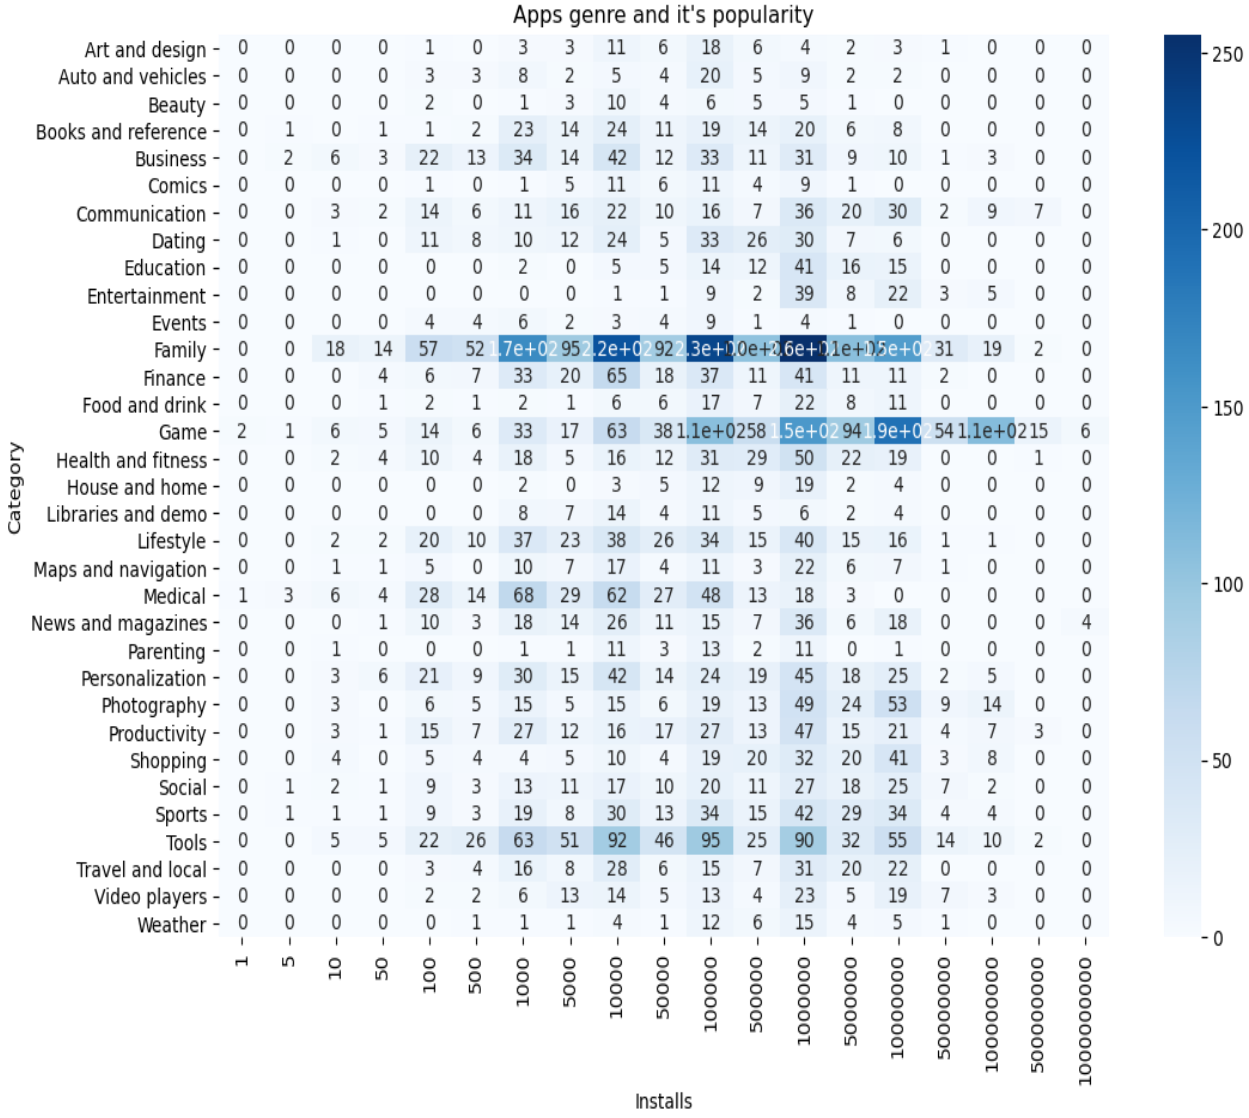


Getting insights from data: size of apps and last update date distribution





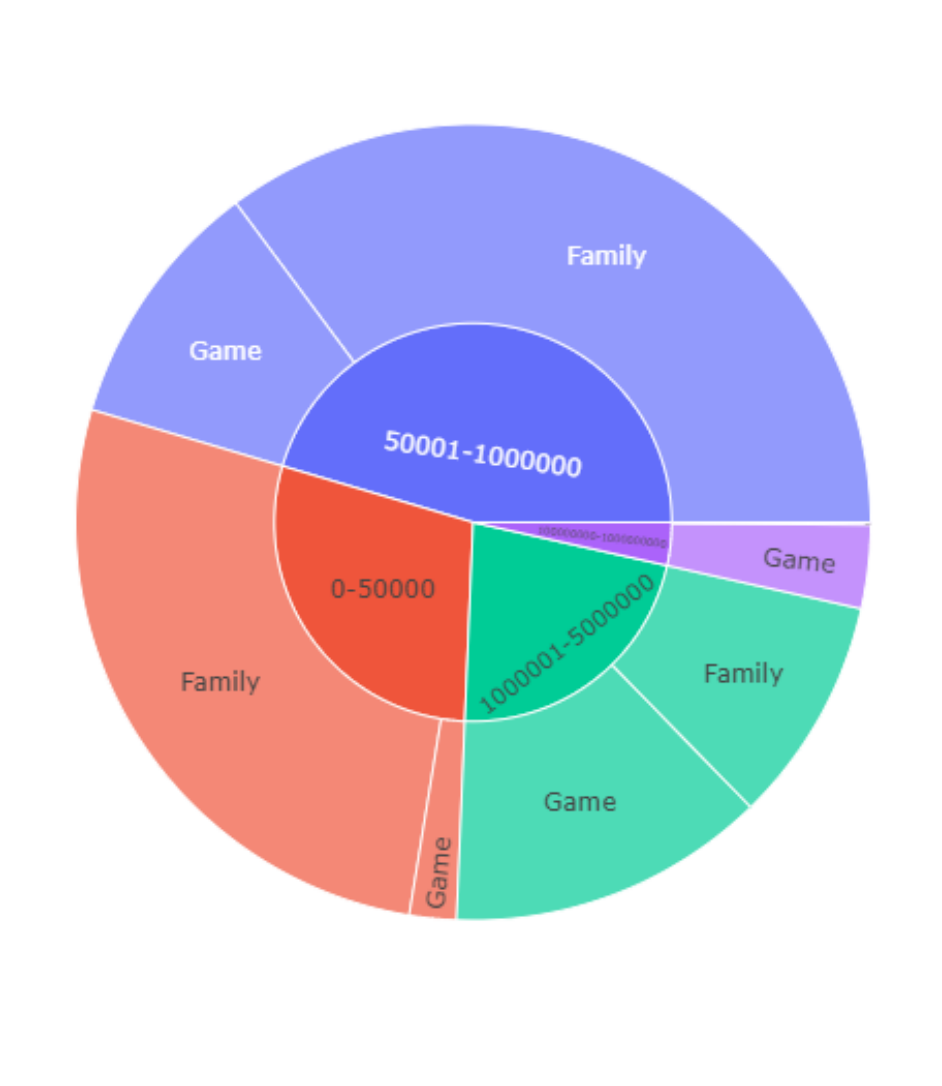
Getting insights from data: correlation of app genre and its popularity



Most popular genres are: family and game.
Apps genres that most likely get most installations: games, communication, news & magazines.

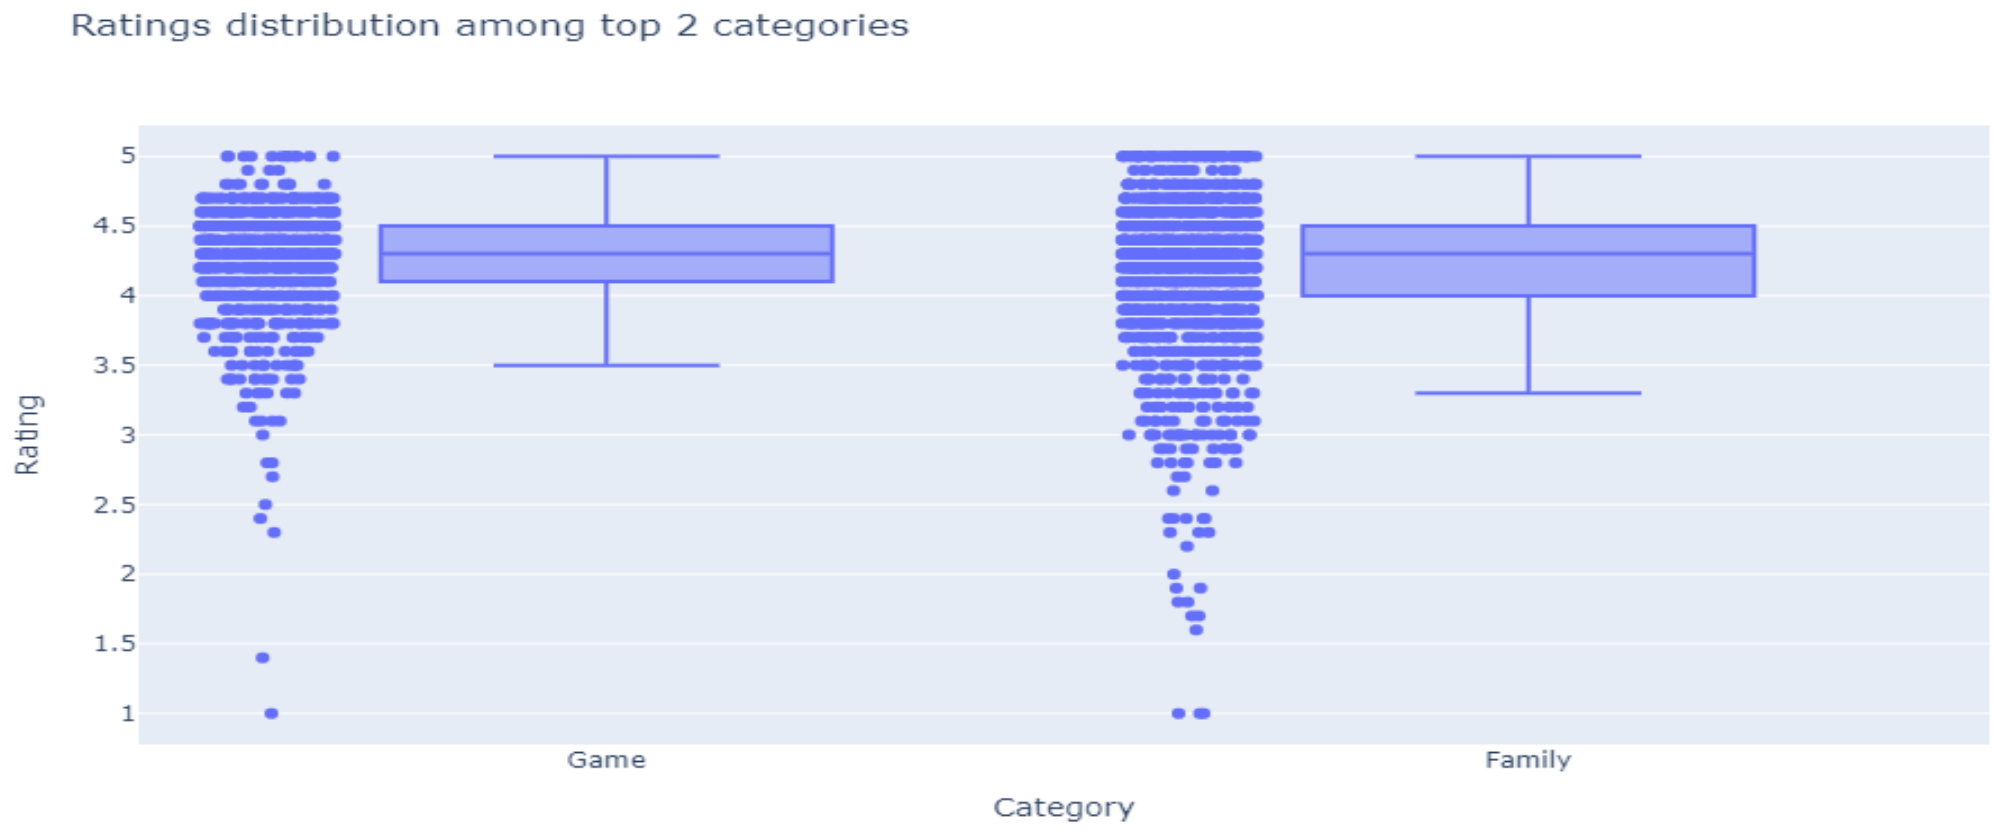
Comparison of installations between games and family genres

FAMILY GENRE HAVE MORE CHANCES TO GET AT LEAST 50000 INSTALLATIONS, THIS TENDENCY GOES UP TO MILLION INSTALLATION. AFTER THAT GAMES TAKE THE LEAD. MEANING THAT THERE IS TRADE-OFF BETWEEN THESE GENRES.

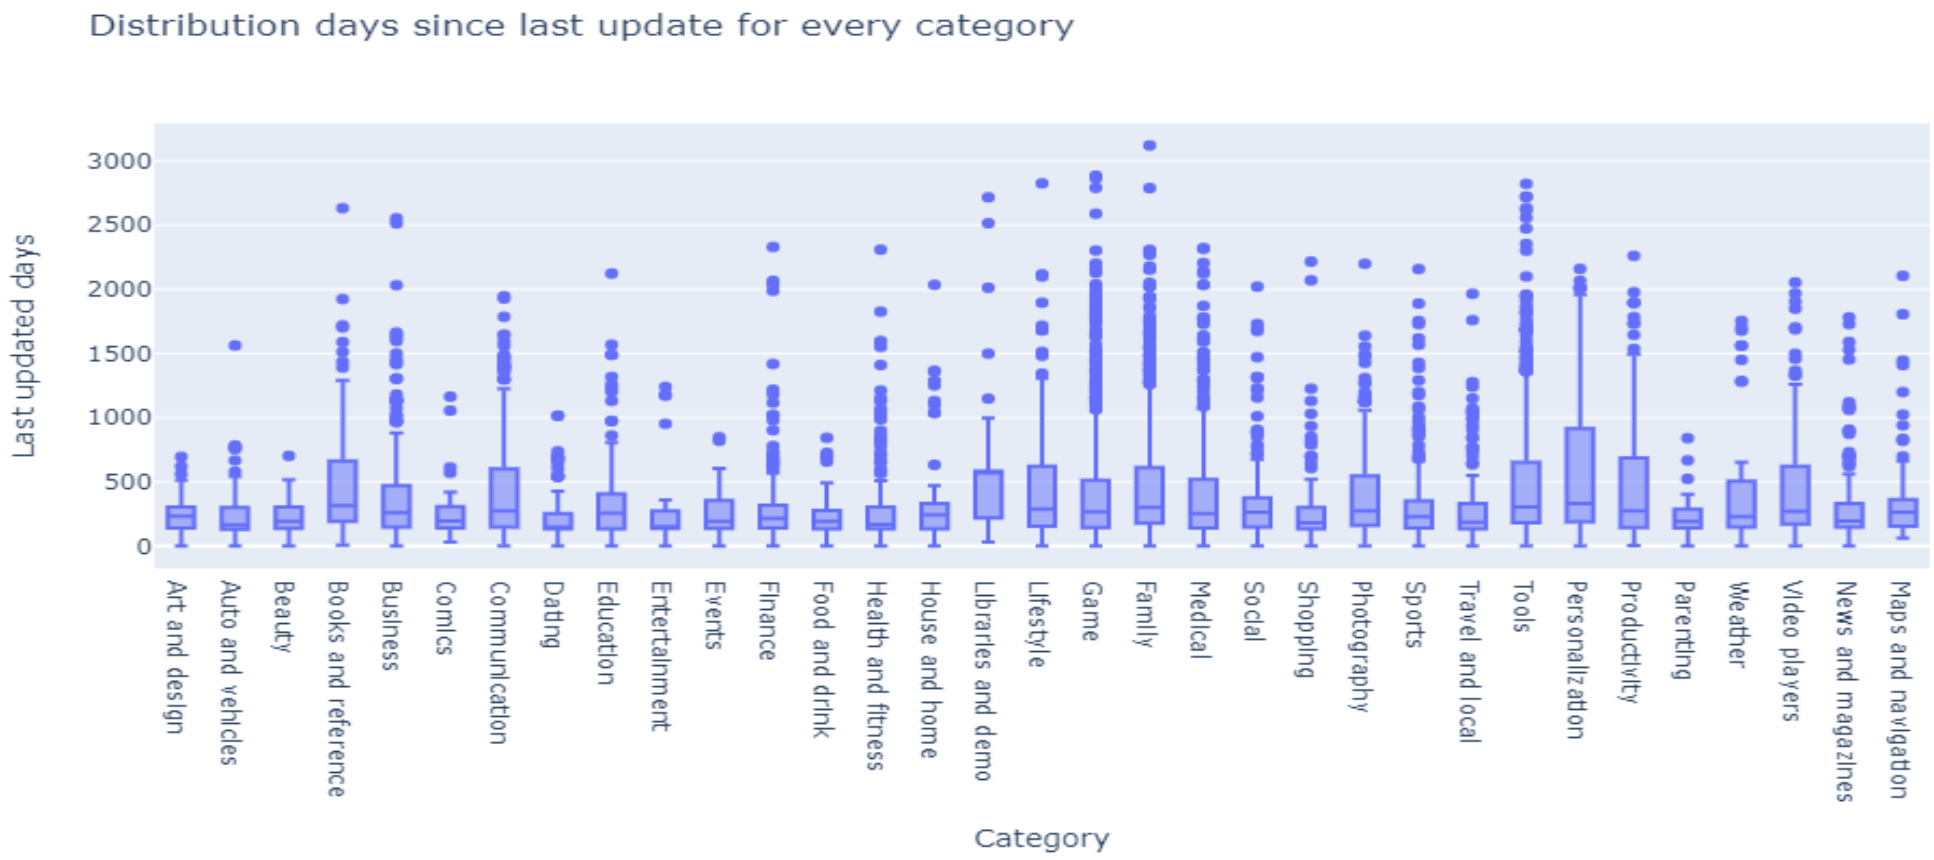


Comparison of ratings among categories

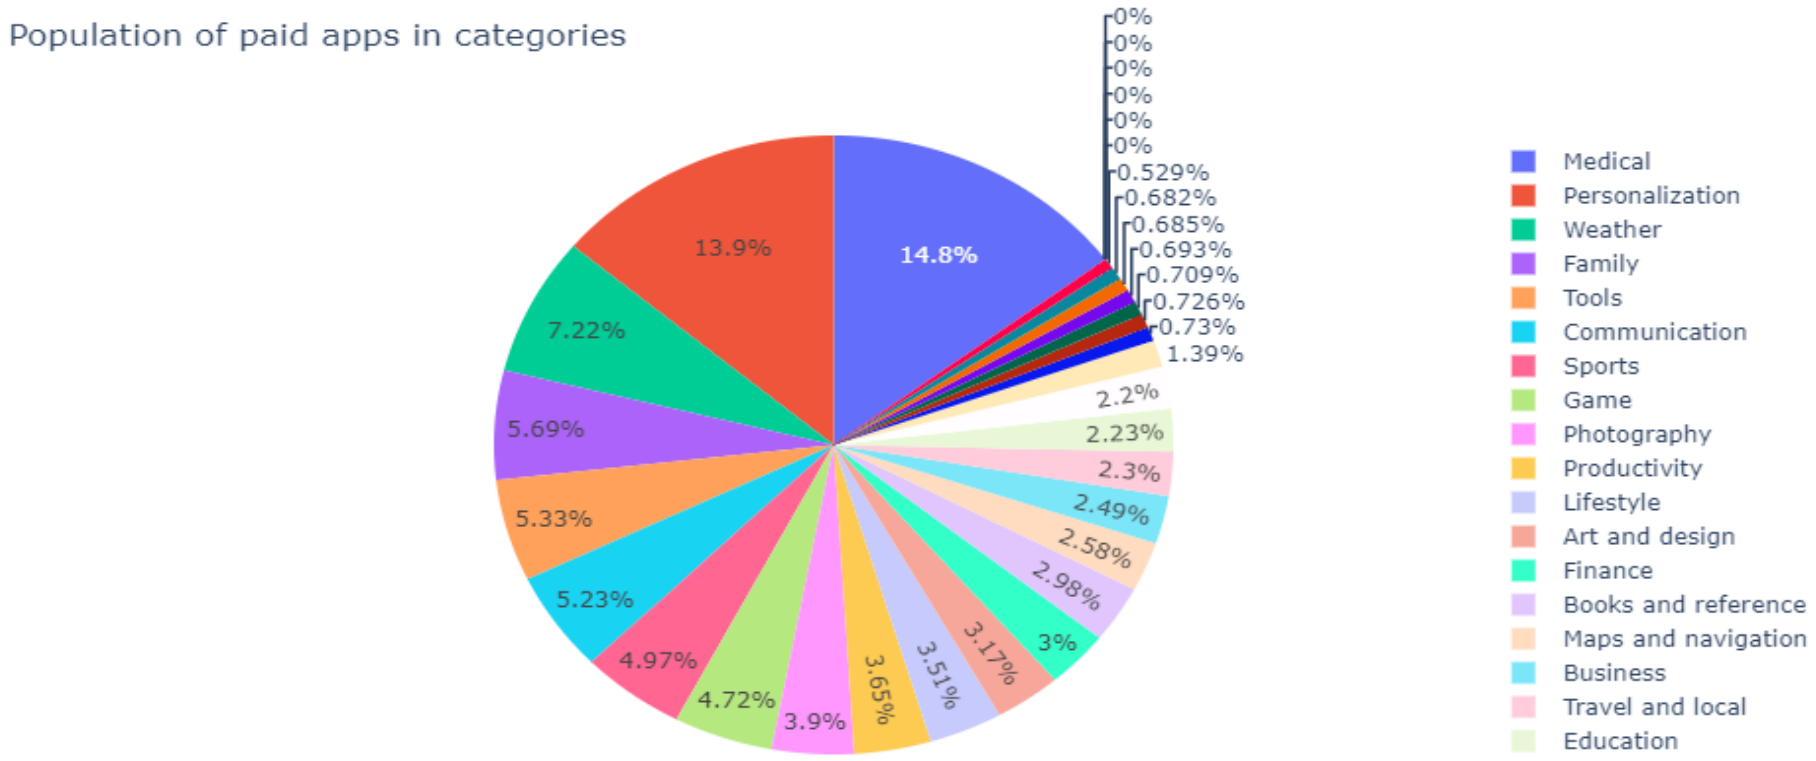
Close comparison of top two genres



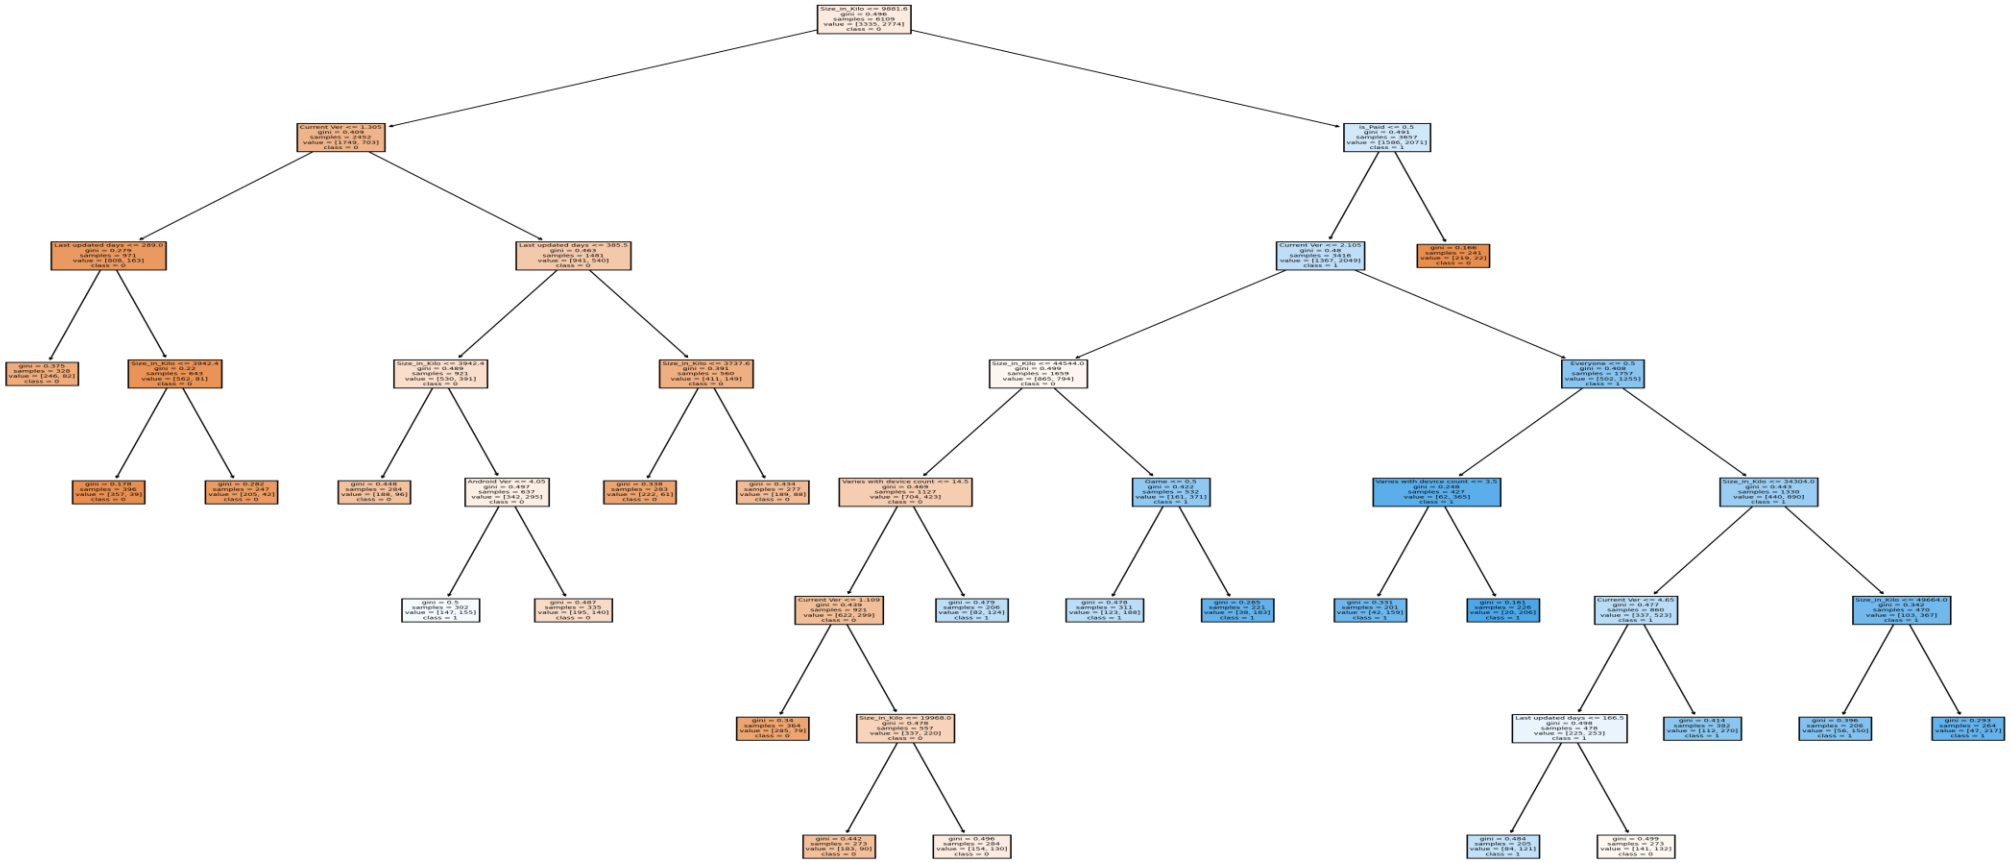
Frequency of support for the application in different genres



What if you want to create paid app?



Training decision tree classifier: What features are most important?



Conclusions

- After this research, you can know that Family and Games genres are most popular in play market.

- If you want to create paid app, I suggest you to create medical or personalized application, that can actually solve problem of target audience. But keep in mind that paid apps, most likely won't reach 100k+ installs.
- Both family and game are complex to create (size of app can proof it) and it's trade-off that you should solve on your own
- There are genres that most devs don't pay attention: Business, events and lifestyle genres have less competition, and have good ratings among users

Thank you for your attention
